1 of 25 – America Root (Constitution)

20131101 7 America / Root
Napolitano, Andrew P.

Review: Theodore and Woodrow – How Two American Presidents Destroyed Constitutional Freedom

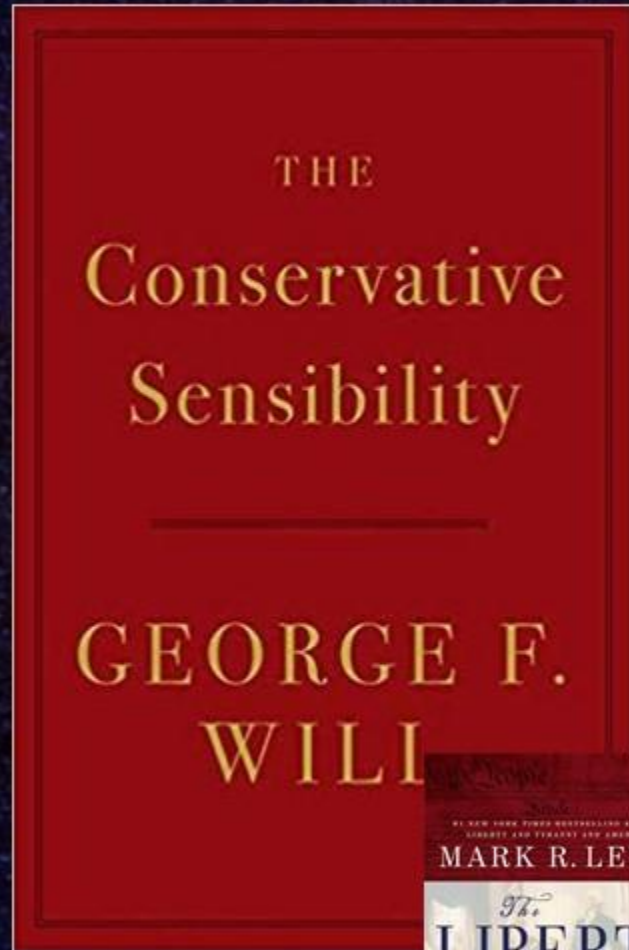

Bottom line: Theodore Roosevelt & Woodrow Wilson broke with the US Constitution. The US Congress and US Supreme Court allowed this treason to occur. Thus began the familiar pattern of “endless war” — treating war as a profit center for the Deep State — knowingly facilitated by the US Congress.

Strategic Context for Understanding True Cost of Empire

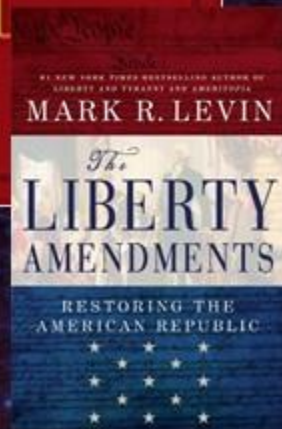

2 of 25 – America Root (Constitution)

20190626 7 America / Root
Will, George

Review: The Conservative Sensibility

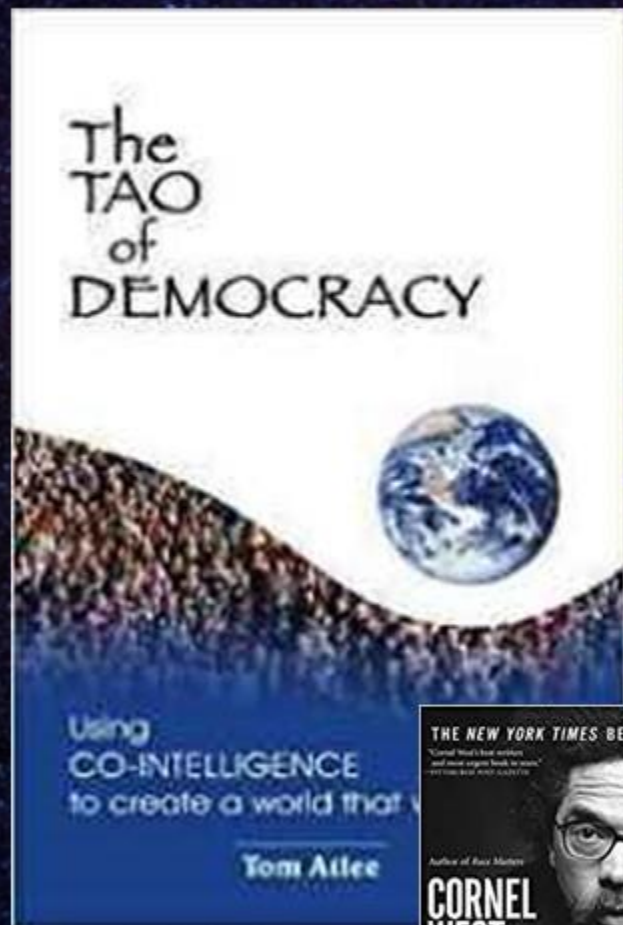

Bottom line: The Supreme Court has abdicated its Constitutional responsibility for interpreting the Constitution in favor of the public and against Executive expansion. Congress has also abdicated its responsibility in allowing Executive taxation and regulation without Congressional approval in detail.

3 of 25 – Consciousness / Democracy

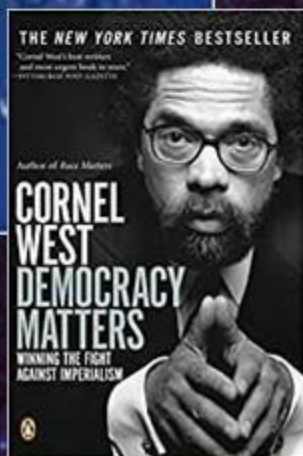

20031130 7 Consciousness

Atlee, Tom

Review: The Tao of Democracy—Using Co-Intelligence to Create a World That Works for All

Bottom line: Collective intelligence — the harnessing of all that can be known by all individuals regardless of their formal education & degree of wealth — is vastly superior to structured institutionalized “intelligence,” and is capable of creating infinite wealth with no waste.

Extraordinarily Thoughtful & Articulate

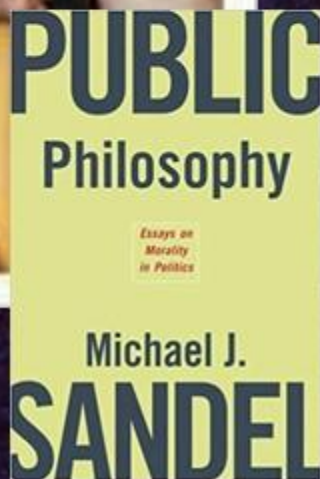

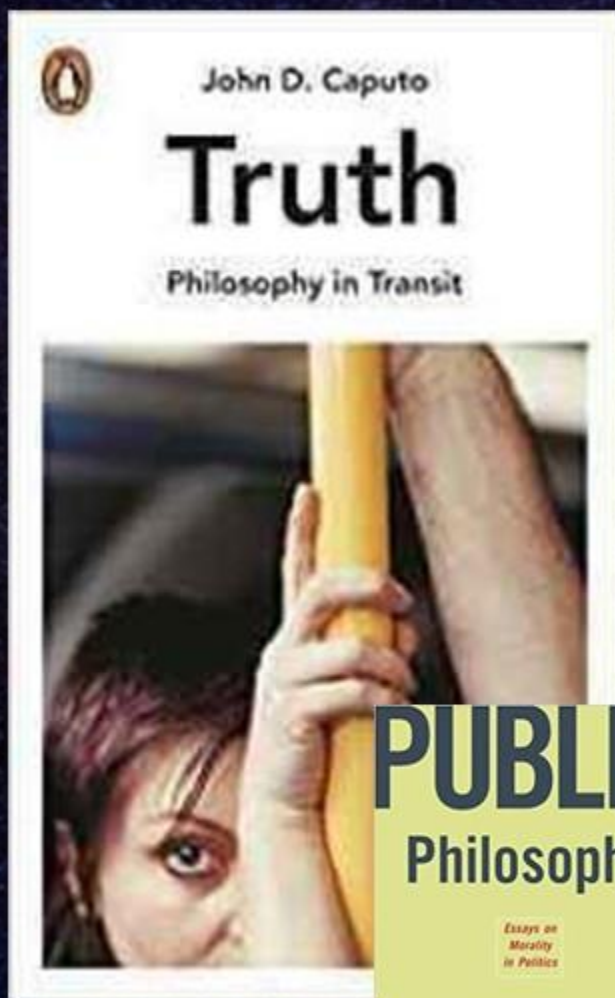

4 of 25 – Consciousness / Truth

20150514 7 Consciousness
Caputo, John D.

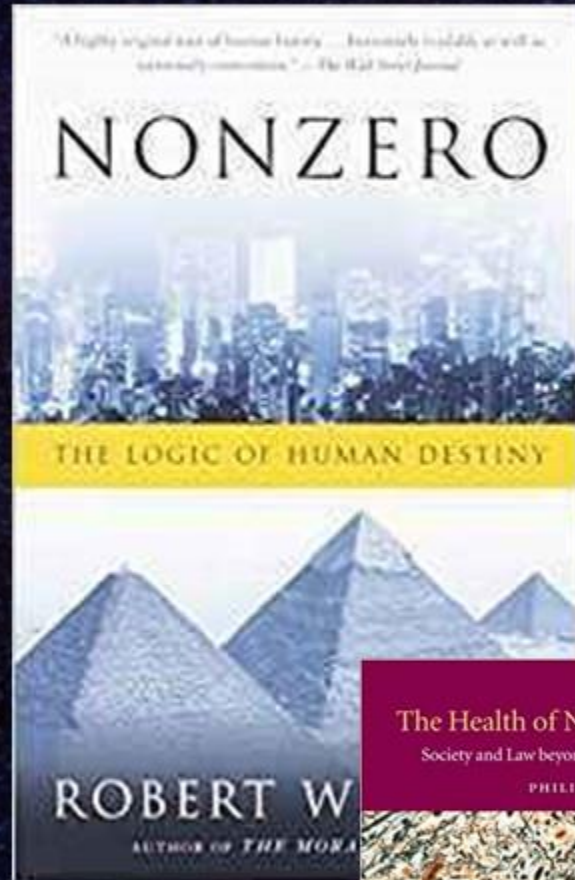

Review: Truth – Philosophy in Transit

Bottom line: Truth is authentic, holistic, inclusive, respectful of all forms of knowing, particularly including faith and intuition. Done right, truth is not absolute, nor can it be dictated — it must be experienced, embraced, ingested & most particularly, co-created with others in community, in faith, in constant revisitation and renewal that integrates new lessons in real time.

Foundation for the Future of the Republic

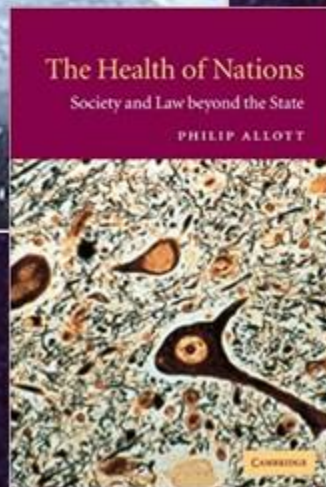

5 of 25 – Consciousness / Wealth

20091128 7 Consciousness
Wright, Robert

Review: **Nonzero—The Logic of Human Destiny**

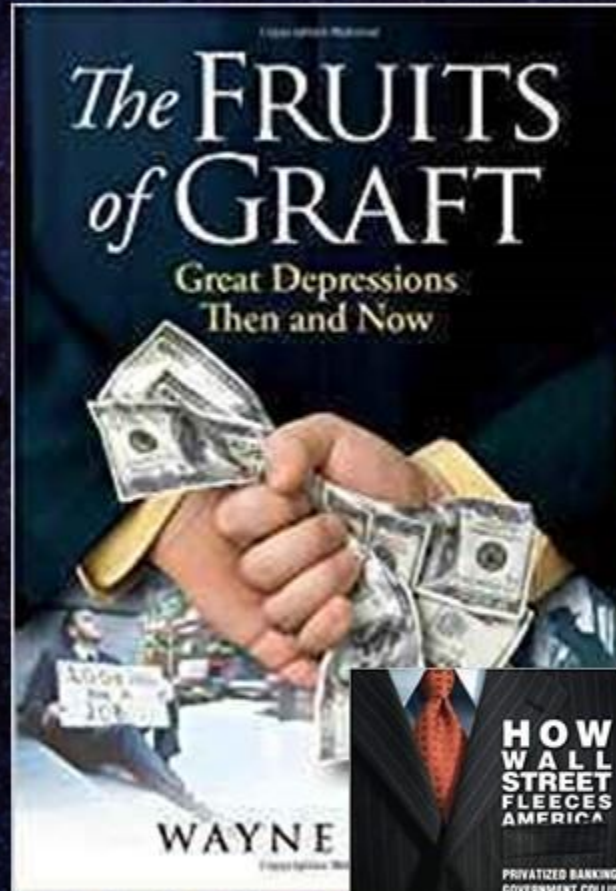

Bottom line: Barbarians and terrorists are a biological reaction to failures in the larger state system that has sought to loot Third World countries without regard to their priceless cultural, historical & linguistic diversity — by denying the humanity of others we have put a stake in our our heart and failed to “be best.”

One of a Handful of Revolutionary Books

6 of 25 – Deep State / Banks

20170526 7 Deep State / \$
Jett, Wayne

Review: The Fruits of Graft

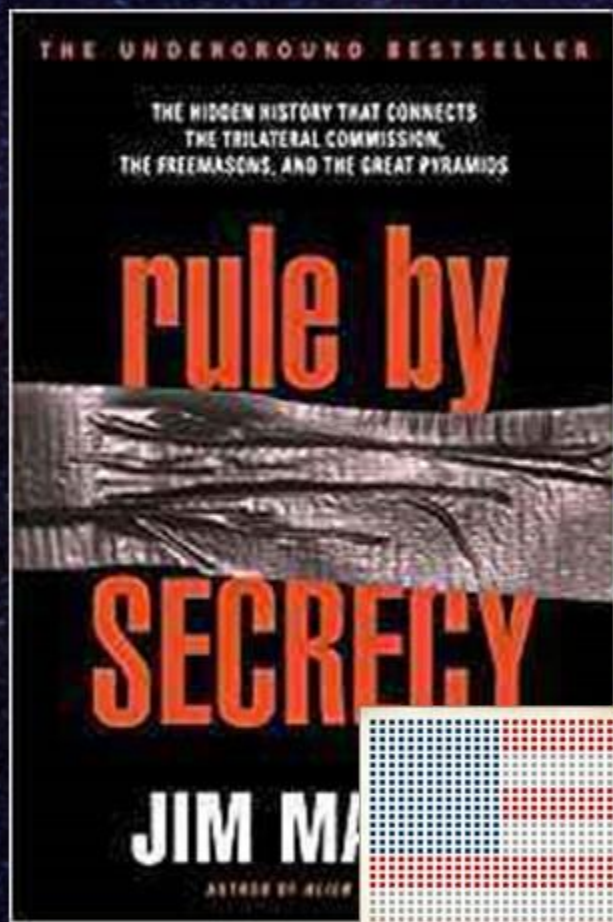

Bottom line: The Great Depression was **CONTRIVED** by the banks, with the complicity of two presidents, to destroy the rising middle class demanding fair government, to buy up America at depression-era prices, and to consolidate banking control over the federal government. FDR betrayed the public trust in every possible respect.

6 Star (My Top 10%) Primer for Every Citizen

7 of 25 – Deep State / Secrecy

20061029 7 Deep State / Secrecy Marrs, Jim

Review: Rule by Secrecy—The Hidden History That Connects the Trilateral Commission, the Freemasons, and the Great Pyramids

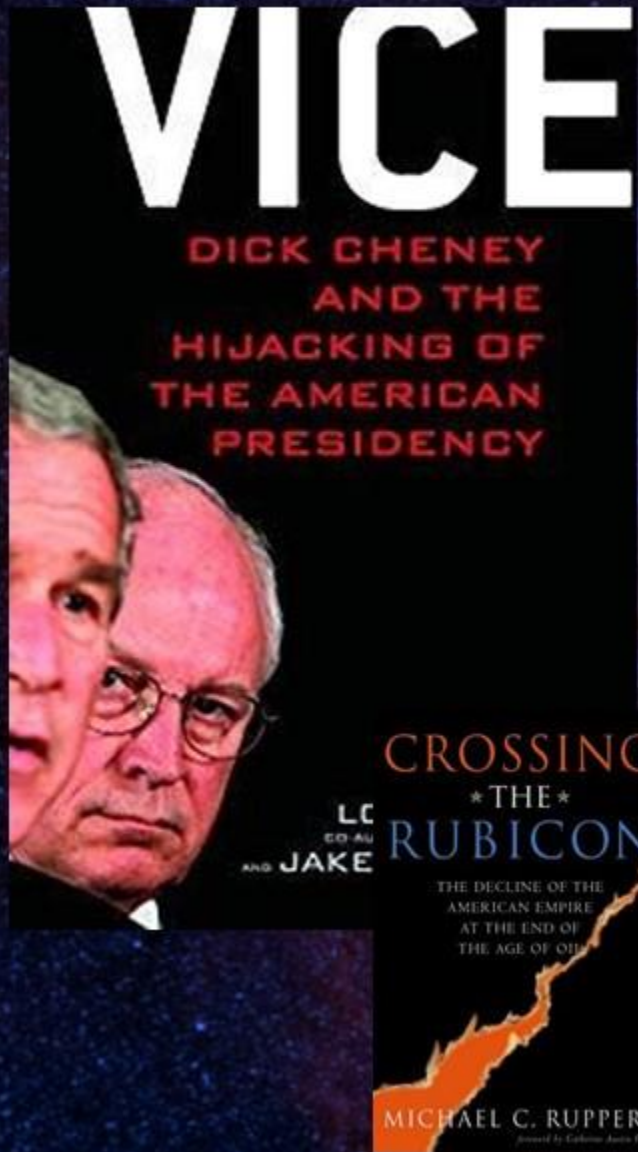

Bottom line: While saving extraterrestrials for the very end, this was — until David Icke's book below, #24 — the single greatest book on the Deep State and its use of Central / Private Banks and Secret Societies to rule over humanity.

This is One of the Most Important Books of Our Time

8 of 25 – Deep State / Secrecy

20070109 7 Deep State / WH
Dubose, Lou

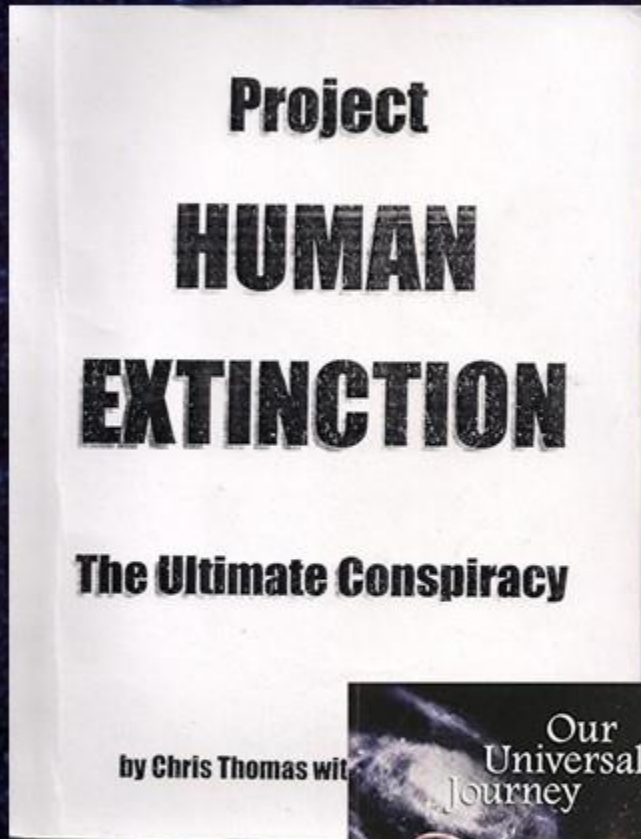

Review: VICE–Dick Cheney and the Hijacking of the American Presidency

Bottom line: Dick Cheney, not the amiable dolt we elected President, was the real ruler over the USA, committing no fewer than twenty-three documented impeachable acts led by the enabling of the Zionist false flag attack known as 9/11, and taking us to war with Iraq & Afghanistan on the basis of 935 lies.

People's Grand Jury Sufficient to Indict Dick Cheney for Murder

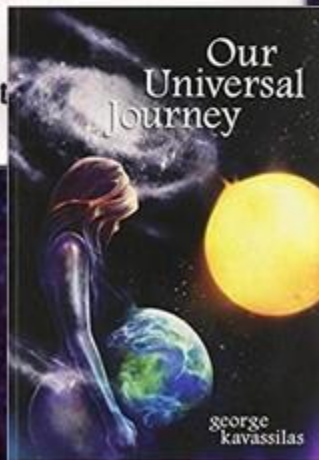

9 of 25 – Extraterrestrial

20170603 7 Extraterrestrial
Thomas, Chris & DM

Review: Project Human Extinction – The Ultimate Conspiracy

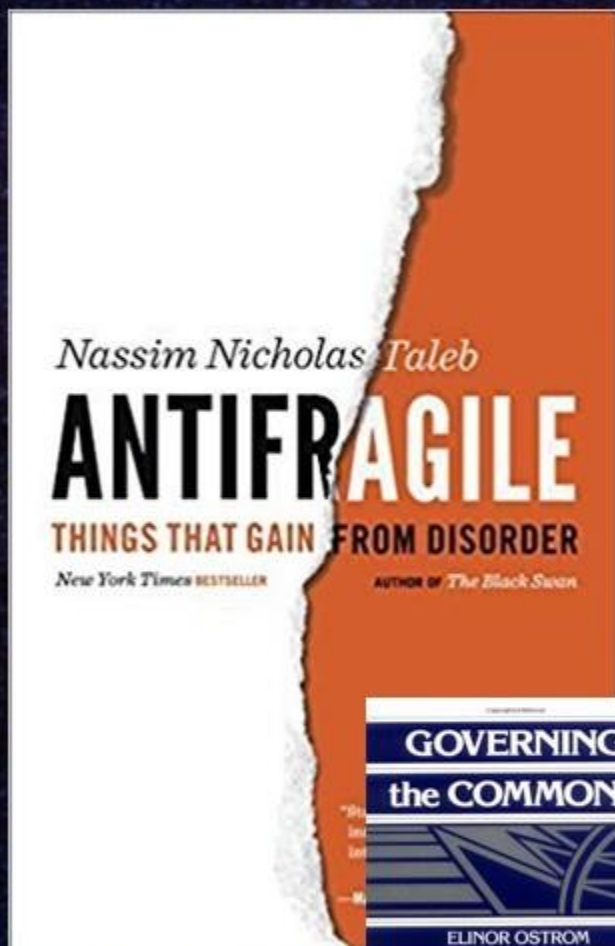

Bottom line: Humanity is a galactic experiment in free will, and has been under oppressive control by the 1% Satanic elite who made a grand bargain with the worst of over 26 known stellar civilizations. The secret intelligence communities & the secret space program are deeply evil — trafficking human beings on a colossal scale, literally of millions of human souls each year, both on and off planet.

Will Explode Your Mind & Free Your Heart to Achieve Infinite Soul Expansion

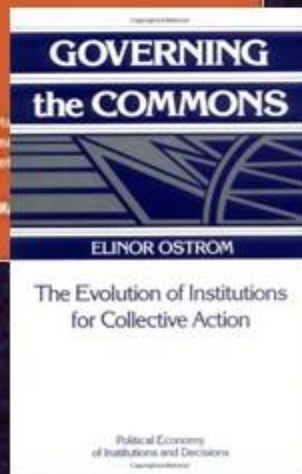

10 of 25 – Governance / Local

20181115 7 Governance / Local
Taleb, Nicholas

Review: **ANTIFRAGILE** – Things That Gain From Disorder

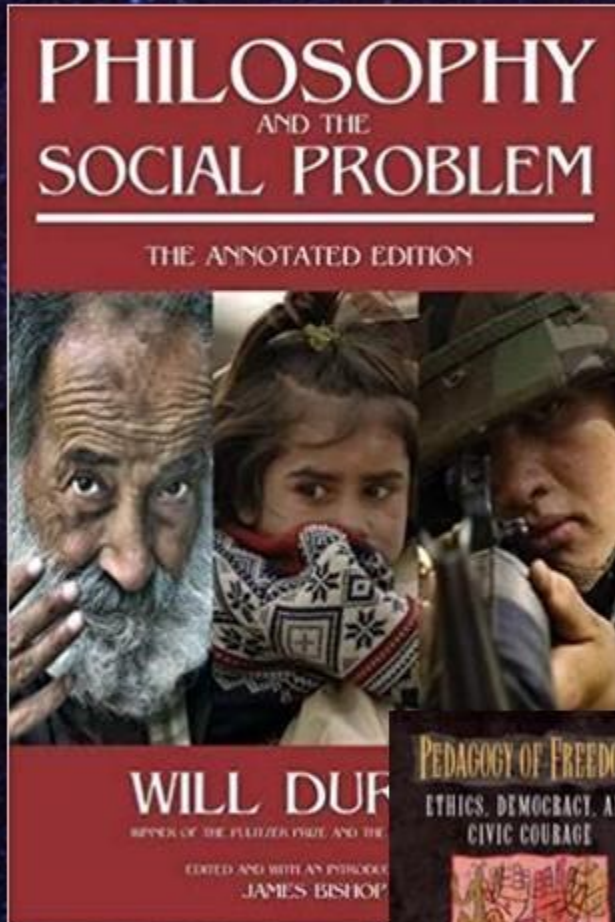

Bottom line: The absolute best way to deal with growing complexity is to **LOCALIZE** and down-size. Too big to fail is assured costly failure. An anti-fragile ecology is one that is open, local, rooted in **INDIVIDUAL** education and **INDIVIDUAL** rights, rooted in deep values that cannot be compromised as liberals wish to do.

6 Star Collective Common Sense
Relevant to **CYBER-Commons** & Not Just Earth Commons

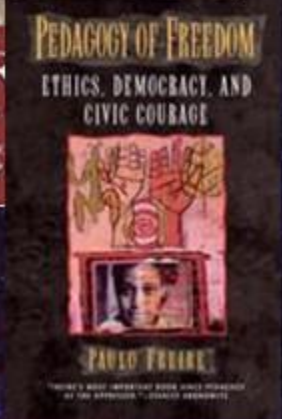

11 of 25 – Governance / Root

20081014 7 Governance / Root Durant, Will

Review: Philosophy and the Social Problem—The Annotated Edition

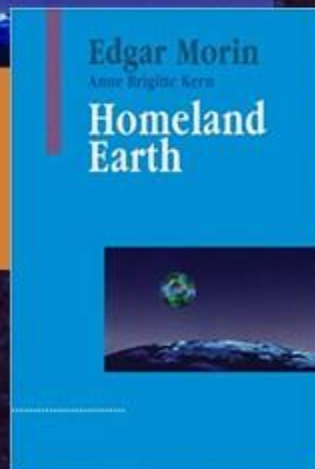

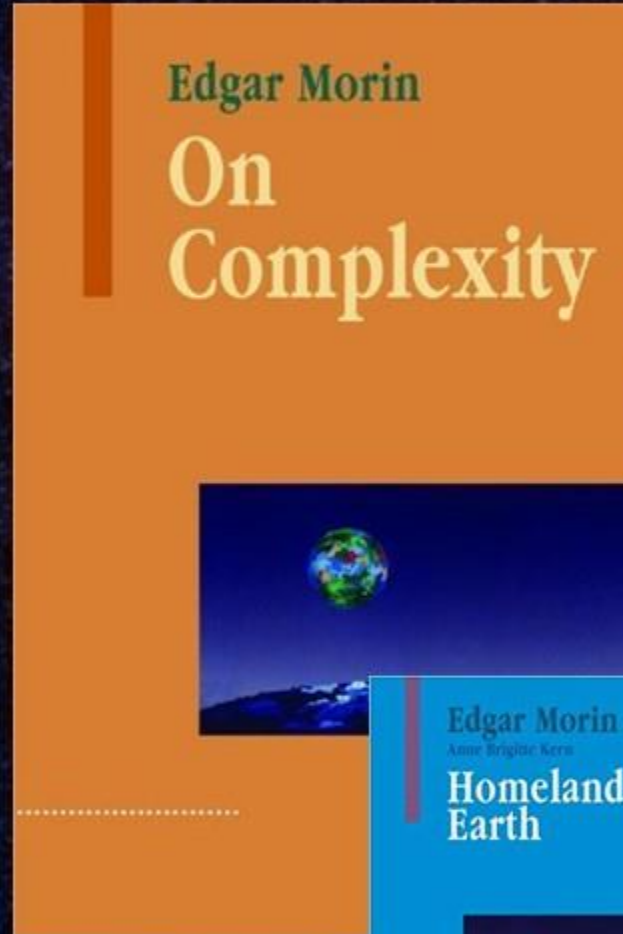

Bottom line: Education of the individual, and strong conservative values across the society, are the essence of achieving peace and prosperity for all. Political science and economics should be integrated disciplines, not separated and value free as they are now, and philosophy — not money, but ethics — must be the foundation for all governance.

Education inspires, makes history & transforms everything else
Education is Liberation, Power & Happiness

12 of 25 – Governance / Root

20130819 7 Governance / Root Morin, Edgar

Review: On Complexity

Bottom line: This choice just edged out Consilience: The Unity of Knowledge & God and Science: Coming Full Circle? **Complex thought** avoids reductionist and dogmatic approaches, and embraces forgiveness as the means by which all points of view can be re-integrated. Complex thought must be multi-disciplinary, multi-cultural & multi-lingual.

Six Star Keeper – Joins Durant, Fuller & Ackoff
This is a PHENOMENAL book

13 of 25 – Governance / World

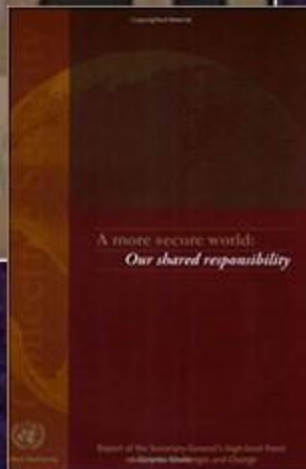

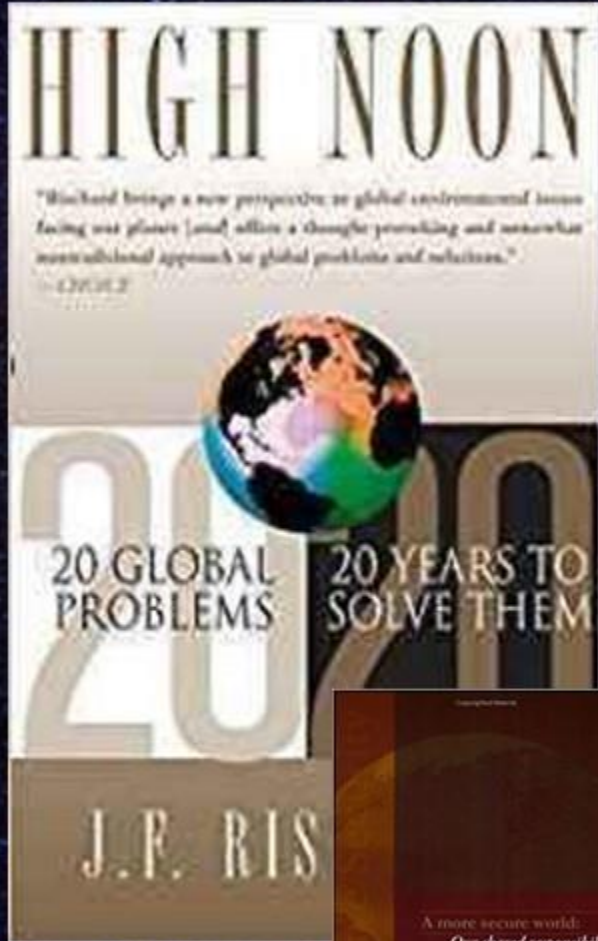

20030820 7 Governance / World Rischard, Jean-F.

Review: High Noon—20 Global Problems, 20 Years to Solve Them

Bottom line: This choice edges out A More Secure World because it is holistic and includes solutions. This book by one man is the gold standard for speaking truth to power and makes it obvious that war and pollution and poverty are profit centers for the 1% — if we can restore ethics to government, infinite wealth is possible.

Seminal Work that Redirected My Life

Defines & Prioritizes the Ten High-Level Threats to Humanity for First Time in History

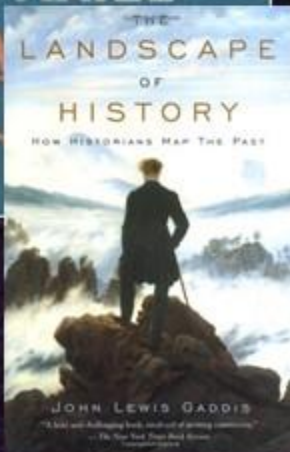

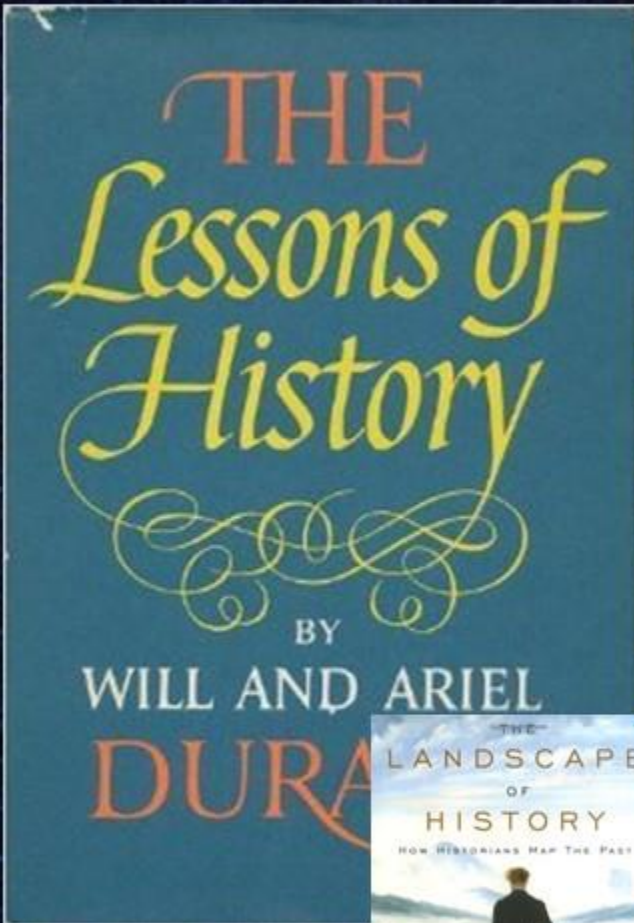

14 of 25 – History / Revolution

20131011 7 History / Revolution

Durant, Will & Ariel

Review: Lessons of History (First Edition)

Bottom line: Education and the transmission of education from one generation to the next is both the ultimate responsibility of every parent, and the foundation for evolving civilization. Demography matters — fail to maintain your borders and ethnic coherence and you will be crushed. History is color-blind, morality is strength. Thinking, not technology, rules.

Brilliant Treatise on History as a "Denied Area"

15 of 25 – Intelligence / CIA

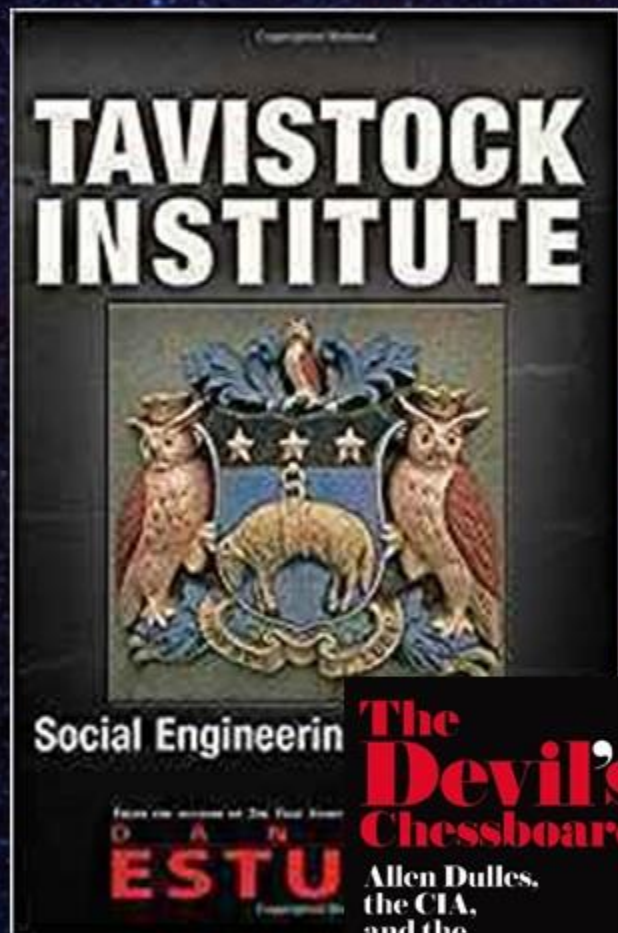

20190405 7 Intelligence / CIA

Estulin, Daniel

Review: TAVISTOCK INSTITUTE – Social Engineering the Masses

Bottom line: Despite my nine years at CIA, including three back to back clandestine tours overseas, I simply had no idea about the depth and breadth of the EVIL being done by the 10% under the direction of the Deep State. The CIA, in its present manifestation, is the enemy of the individual, the family & the nation-state.

16 of 25 – Justice / Corrupt

20190803 7 Justice / Corrupt
Powell, Sidney

Review: Licensed to Lie – Exposing Corruption in the Department of Justice

Bottom line: The Department of Justice is a criminal network that allows federal prosecutors to manufacture false evidence and conceal exculpatory evidence (Brady material) in order to win cases without regard to fairness or justice. Judges are not doing their job of holding federal prosecutors accountable for fairness in justice.

INTEGRITY — Easy to Lose, Hard to Restore

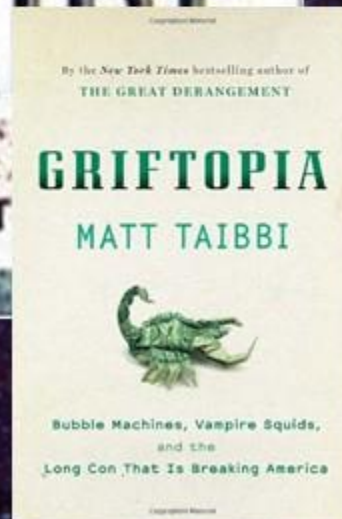

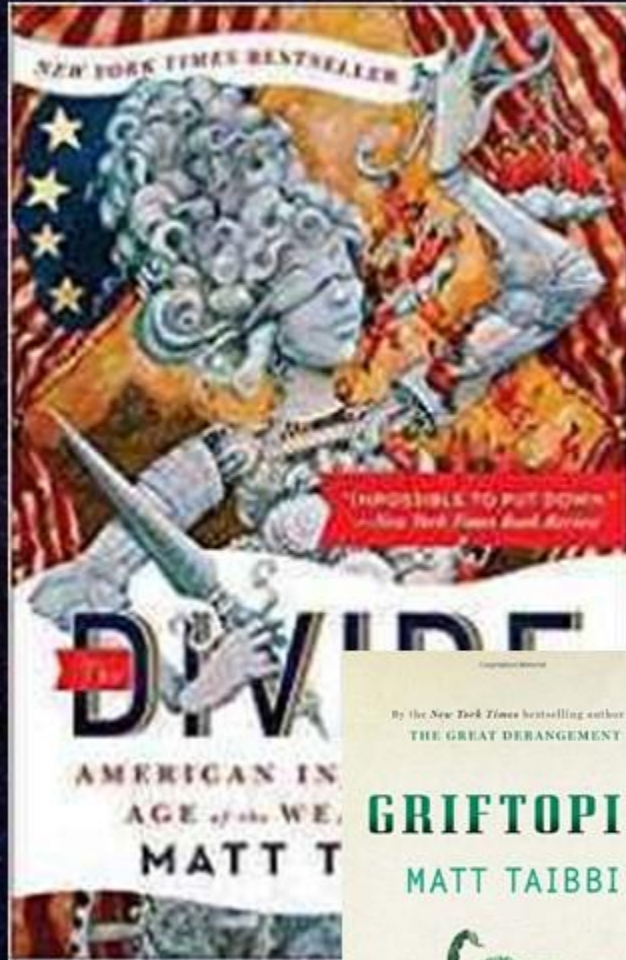

17 of 25 – Justice / Corrupt

20190829 7 Justice / Corrupt
Taibbi, Matt

Review: The Divide – American Injustice in the Age of the Wealth Gap

Bottom line: Eric Holder created a new policy in which banks & corporations were no longer held accountable for crimes, only civil transgressions where no one goes to jail. At the same time, a police state has been created, particularly against blacks who can be arrested for obstructing the sidewalk when standing alone, late at night, in front of their own home.

6 Star Game Changer ... Maybe
Documents the Merger of Political & Financial Crime Across the USA

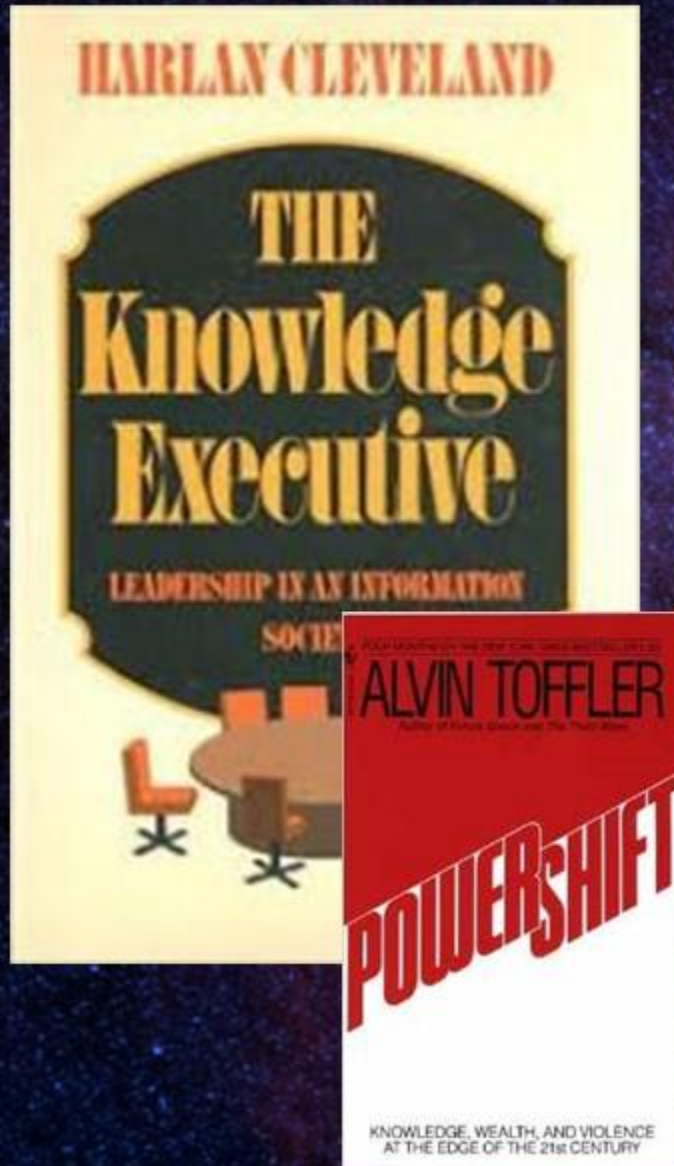

18 of 25 – Leadership

200005297 Leadership
Cleveland, Harlan

Review: The Knowledge Executive—Leadership in an Information Society

Bottom line: It is not possible to be a leader without striving to achieve a holistic grasp — or at least access to those who know — of all threats, all policies & all costs. “Higher” education should be the gold standard for leaders, but it is not. This book helped me understand that the US secret intelligence community is largely worthless & totally divorced from useful reality.

One of Five Really Core Books on Information Age

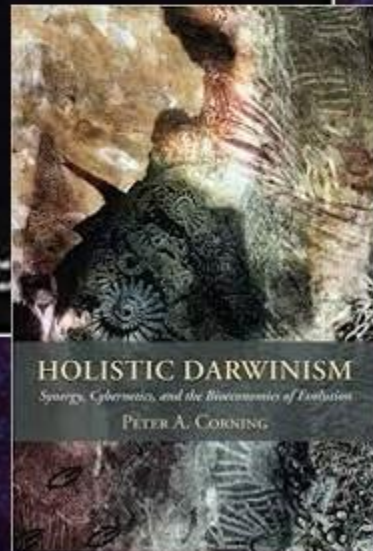

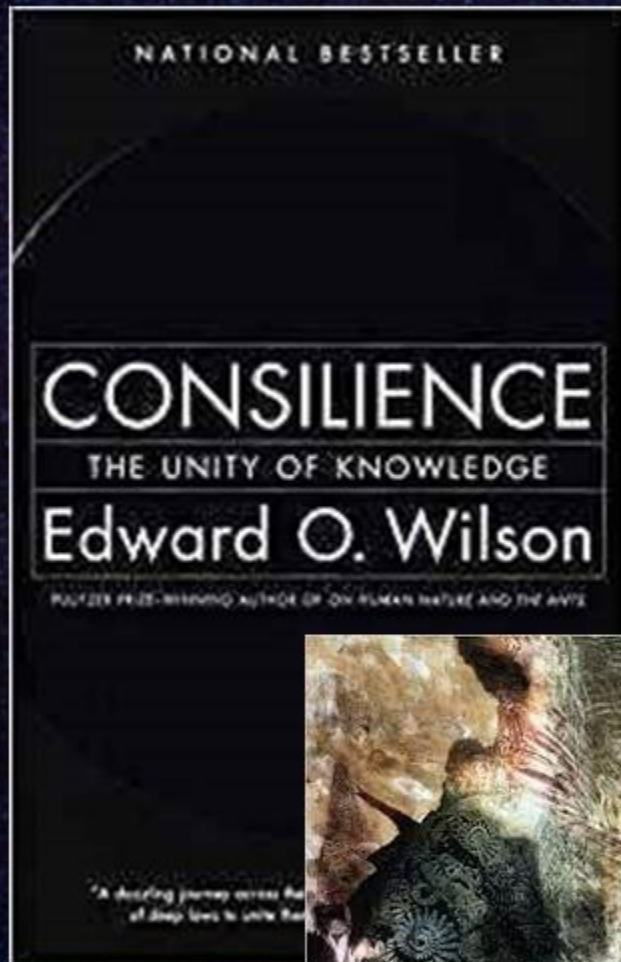

19 of 25 – Leadership

20000529 7 Leadership
Wilson, E. O.

Review: Consilience—The Unity of Knowledge

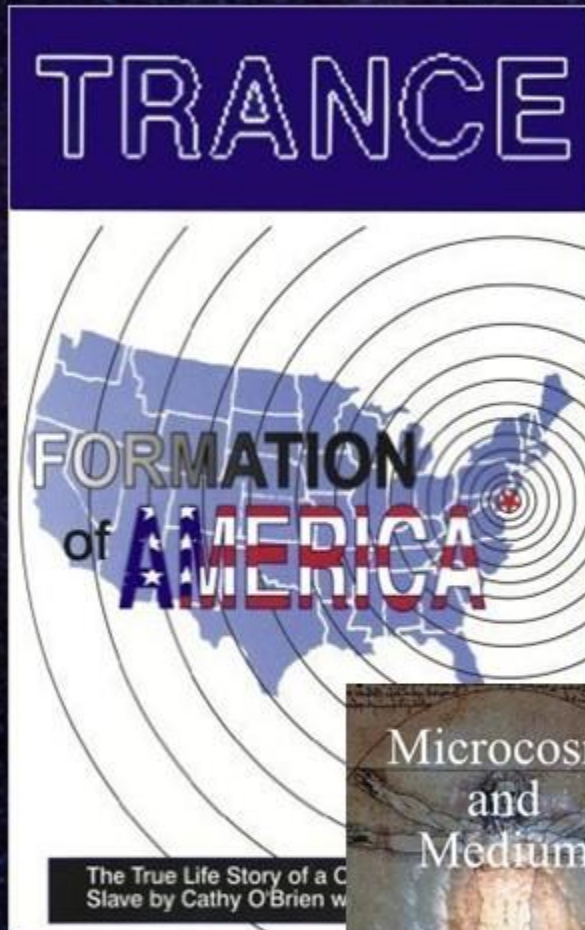

Bottom line: Neither knowledge nor intuition and faith or other forms of tacit knowledge can be separated without an enormous loss of the whole — just as one cannot isolate body organs, nerves, muscles, bones, without killing the host. Answers the question: why must the sciences & the social sciences be fully integrated in every way?

I could spend a lifetime reading & re-reading this book

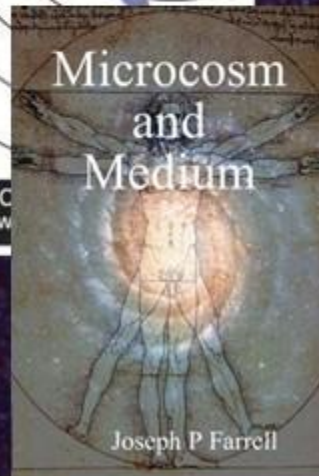

20 of 25 – Mind-Control / NASA

20170706 7 Mind-Control
O'Brien, Cathy & Mark Phillips

Review: Trance: Formation of America

Bottom line: NASA, not CIA, is the center of evil in the USA when it comes to mind-control & human trafficking: mind-controlled sex slaves for leaders on earth & massive human trafficking, in the millions, for feeding extraterrestrial demands. NSA cannot intercept messages sent via mind-controlled humans, such as Dick Cheney used. Both the Music & Mental Health Industries are fully owned and controlled by the Deep State Cabal.

Cosmic Implications & Agenda of Mind Control Technologies

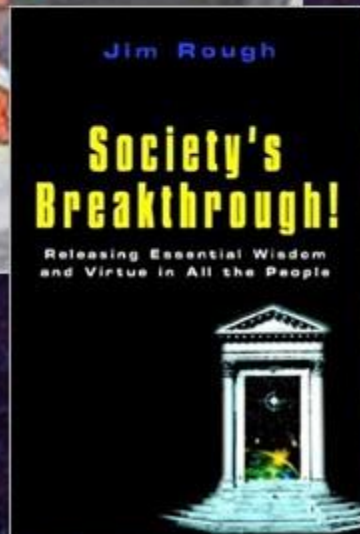

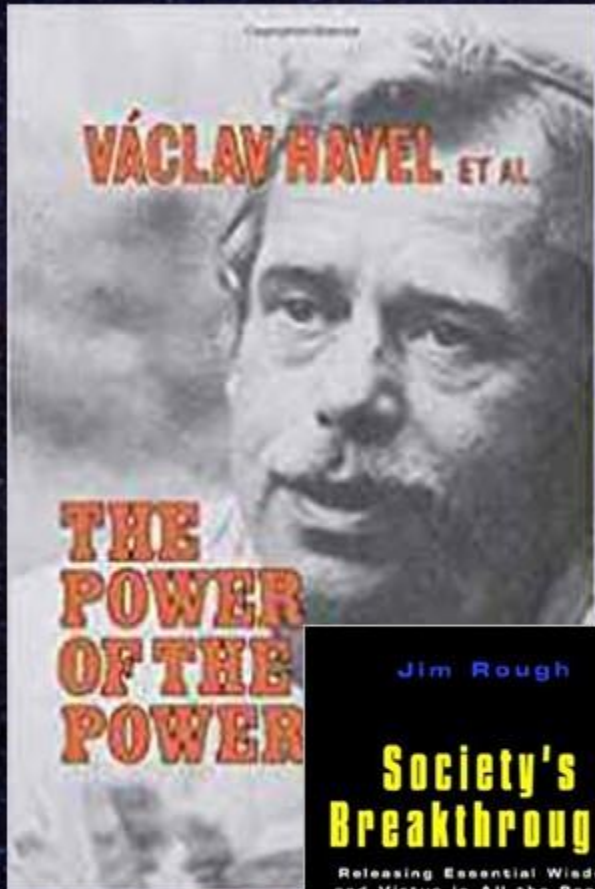

21 of 25 – Revolution / Public Power

20020726 7 Revolution / Public Power Havel, Vaclav

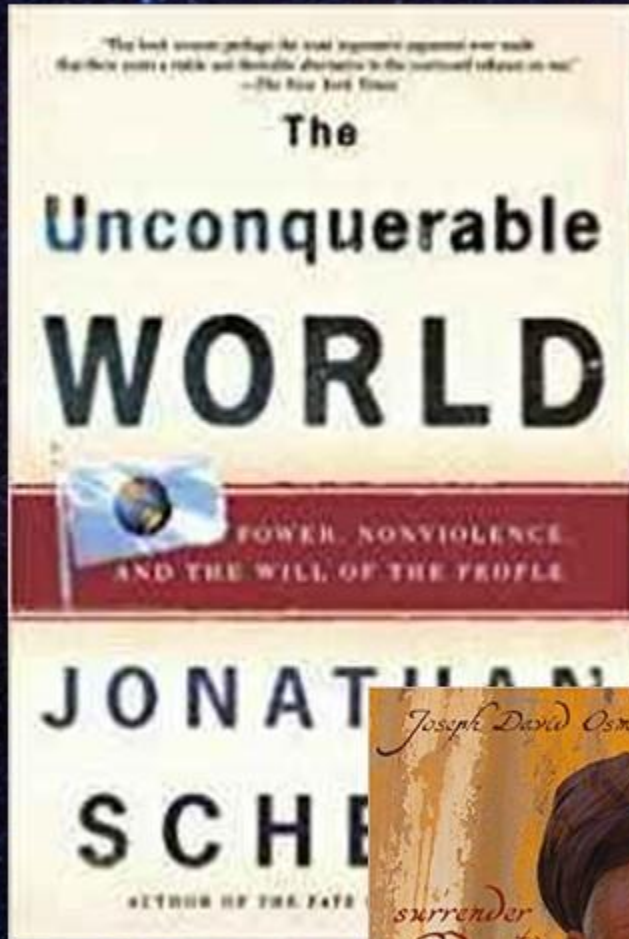

Review: The Power of the Powerless—Citizens Against the State in Central-Eastern Europe

Bottom line: The only thing that can overturn organized money is organized humanity – that is both the Power of the People, and the Achilles Heel of the Public. This book is a portrait of how dissent is repressed, and how sparks can ignite a national fire that censors cannot put out. The truth is a force for good — communicating it to the many is the greatest challenge for any ethical leader.

Renaissance of We the People, Unifying the Young & Old

22 of 25 – Revolution / Public Power

20030913 7 Revolution / Public Power Schell, Jonathan

Review: The Unconquerable World—Power, Nonviolence, and the Will of the People

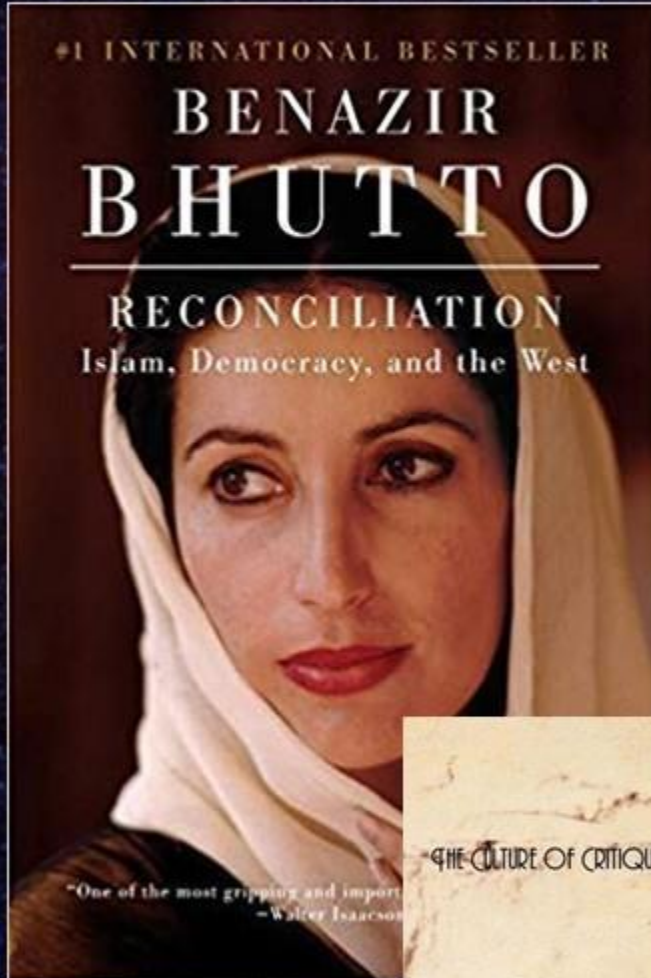

Bottom line: War may be a profit center for now, and wars may continue as long as governments and banks and the media can lie with impunity, but that era is coming to an end. This was the first book that helped me understand both the degree to which wars are based on lies, and the inevitability of the public demanding peace.

6 Star & Beyond
Deep, Soul-Moving, Raw Truths

23 of 25 – Strategy / Solutions

20080307 7 Strategy / Solutions

Bhutto, Benazir

Review: Reconciliation—Islam, Democracy, and the West

Bottom line: This is the most methodical account I have ever seen of the history, geography, and misdirection of the entire Muslim world, more often than not, at the hands of the West or secular dictators it installed and supported. It rejects Saudi terrorism and makes the case for a Muslim renaissance rooted in peace.

Brilliant Dissection of Political & Economic History —
Reality — that is CENSORED by Amazon & the Mainstream Media

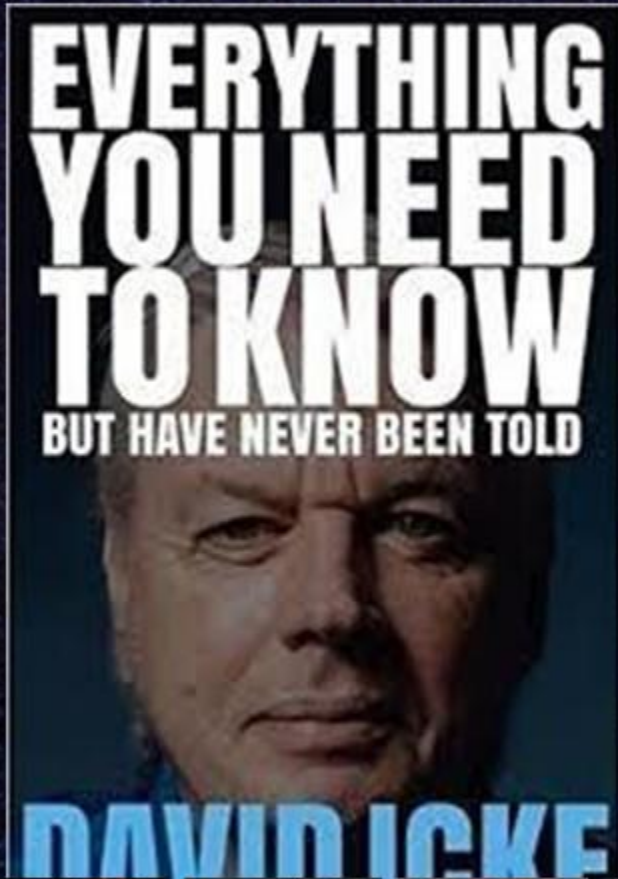

24 of 25 – Truth on Everything

20190524 7 Truth on Everything
Icke, David

Review: [Everything You Need to Know But Have Never Been Told](#)

Bottom line: I have never, in my lifetime, encountered a book so important as to warrant a 40 Page Summary Review. This is a master work (741 pages) that covers everything from extraterrestrials and mind-control to banks and corporations, governments and religions, secret societies and universities – all in constant betrayal of the public trust.

Multiple books by Dr. Joseph P. Farrell, Oxford, on stellar civilizations, mind-control, elite networks, the 4th Reich, Babylon, Egypt, physics, God, and more

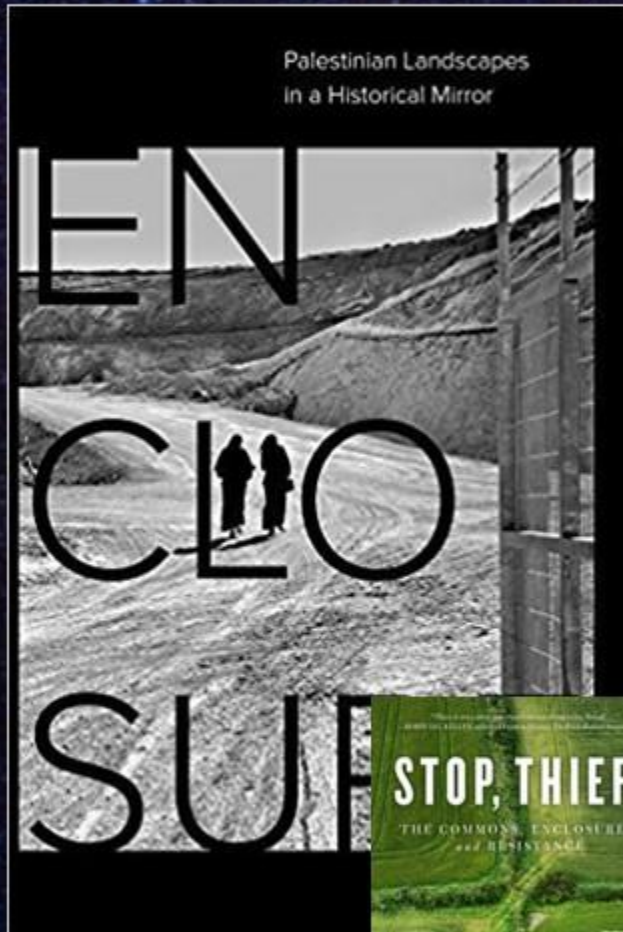

25 of 25 – Zionism / Genocide

20180406 7 Zionism / Genocide
Fields, Gary

Review: Enclosure – Palestinian Landscapes in a Historical Mirror

Bottom line: This is the book that persuaded me that we must eliminate the invented criminal genocidal apartheid state of Israel, and restore Palestine to the Palestinians. First, studying the genocide & enclosure of American Indians and British freemen, the author concludes with a full account of the Zionist occupation of Palestine. Zionism is not Judaism; first is evil, second is not.

Robert David STEELE Vivas Building on Monica Anderson: Science Beyond Reductionism

Goal – Think Holistically

	Political-Legal	Socio-Economic	Ideo-Cultural	Techno-Demographic	Natural-Geographic
Perception	Isolation of elites; inadequate intelligence	Concentration of wealth; lack of public disclosure	Conflicting myths; inadequate socialization	Acceptance of media distortions; inadequate education	Reliance on single sector or product; concentrated land holdings
Identity	Lack of elite consensus; failure to define priorities	Loss of economic initiative; failure to do balanced growth	Loss of authority; failure to provide and honor national myth system	Failure to accept and exploit new technologies and new groups	Failure to integrate outlying territories into national system
Competence	Weak or inefficient government; too much or too little bureaucracy	Breakdown of fiscal, monetary development, or welfare policies	Humiliation of leaders; loss of confidence by population	Failure to enforce priorities, with resulting loss of momentum	Failure to prepare or cope with major national disasters
Investment	Ego-centric or parochial government	Excessive or insufficient mobility; lack of public sector	Cynicism; opportunism; corruption	Failure to nurture entrepreneurship or franchise all groups	Failure to preserve or properly exploit natural resources
Risk	Elite intransigence; repression; failure to adapt	Failure to deal with crime, especially white collar crime	Failure to deal with prejudice; desertion of intellectuals	Failure to develop national research & development program	Failure to honor human rights; failure to protect animal species
Extroversion	Ineffective tension management; failure to examine false premises	Structural differentiation; lack of national transportation network	Elite absorption of foreign mores; failure to deal with alienation	Failure to develop communications infrastructure; shared images	Failure to explore advantages of regional integration
Transcendence	Foreign control of government; arbitrary or excessive government	Loss of key sectors to foreign providers; loss of quality control	Media censorship; suppression of intellectual discourse	Failure to control police, army, or terrorists; failure to employ alphas	Failure to respect natural constraints or support organic growth
Synergy	Failure to assimilate all individuals or respond to all groups	Status discrepancies; lack of economic motivators	Absence of sublimating myths; failure of religion	Failure to provide program and technology assessment	Failure to distribute benefits between urban and rural
Complexity	Garrison, industrial, or welfare states	Unstable growth; excessive defense spending	Cultural predisposition toward violence	Excessive urbanization, pollution, or development	Lack of land for expansion; inefficient use of land
